

How it works

1

Browse through courses

Browse through the available course catalogue or get directed to the diagnostic test section.

2

Take the diagnostic test

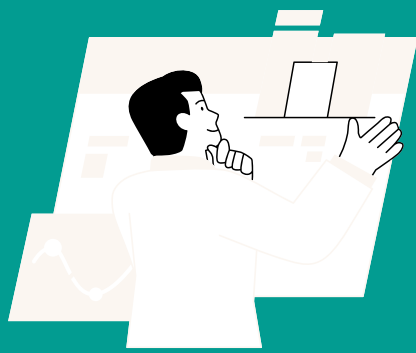

Complete the test and submit it. The platform analyzes your results. (If you can comfortably read and understand our brochure and website, you'll have no trouble with the language used in the course.)

3

Choose a course

Browse through the course descriptions, objectives, and prerequisites. Confirm that the course matches your learning goals and skill level.

4

Pay for the course

Click the "Enroll" or "Purchase" button for your chosen course. Provide payment details (credit card, PayPal, or other supported methods). Review the payment summary and confirm the transaction.

5

Receive an email with instructions

Check your email inbox for the confirmation and further instructions.

6

Start your course

Log in to the platform using the provided credentials or access your dashboard. Courses are asynchronous, so you can study at your own pace.
